

VISHWAS CHAURASIA

+91 8317071109 | vishwas4859@gmail.com | linkedin.com/in/vishwas4859 | github.com/vishwas4859

PROFESSIONAL SUMMARY

Pre-final year B.Tech Computer Science student (2027) with strong foundations in Data Structures, Algorithms, DBMS, Operating Systems, and backend development. Experienced in designing scalable full-stack applications using Python, JavaScript, React.js, and MongoDB. Skilled in REST API development, database optimization, authentication systems, performance tuning, and system debugging. Passionate about building efficient, reliable, and data-driven software systems.

EDUCATION

Chitkara University

B.Tech in Computer Science Engineering

Rajpura, Punjab

Aug 2023 – Jun 2027

Scholar's Academy

Senior Secondary (Mathematics & Computer Science)

Maharajganj, Uttar Pradesh

Apr 2021 – Apr 2022

PROJECTS

AI Invoice Generator – Scalable Full Stack Application

Python, MongoDB, React.js, REST APIs, JWT Authentication

Dec 2025 – Present

github.com/vishwas4859/Ai-Invoice-Generator

- Engineered a secure full-stack invoice management system supporting authentication, CRUD operations, and structured data storage.
- Designed and integrated 8+ RESTful API endpoints enabling seamless frontend-backend communication.
- Optimized database queries and indexing strategies, reducing average response latency by 25%.
- Implemented structured logging and error-handling mechanisms to monitor user flows and system performance.
- Applied modular architecture principles improving scalability, maintainability, and code reusability.

Automated API Data Fetcher & Analytics Dashboard

React.js, REST APIs, JSON Processing

2025

github.com/vishwas4859/Random-Gif-Generator

- Integrated third-party public APIs handling dynamic JSON payloads and asynchronous requests.
- Processed and transformed structured datasets for real-time rendering and visualization.
- Implemented validation, exception handling, and fallback mechanisms reducing API failure impact by 30%.
- Simulated session and feature-usage tracking to analyze engagement patterns and performance metrics.

TECHNICAL SKILLS

Programming: Python, Java, JavaScript

Core CS: Data Structures, Algorithms, OOP, DBMS, Operating Systems

Backend & APIs: REST API Design, API Integration, Authentication (JWT), HTTP Methods

Web Development: React.js, JSON, Asynchronous Programming

Databases: MongoDB, SQL (Basics), Database Indexing, Query Optimization

Tools: Git (Version Control), Linux, VS Code, Postman

CERTIFICATIONS

Cloud Data Engineering – Coursera (SQL querying, ETL workflows, structured data pipelines)

Introduction to Agile Development and Scrum (Sprint planning, backlog prioritization)

Introduction to DevOps (CI/CD lifecycle and deployment processes)

PROFESSIONAL DEVELOPMENT & TECHNICAL GROWTH

Actively practice algorithmic problem-solving and participate in peer-led technical discussions focused on system design, debugging strategies, and backend optimization. Continuously enhance understanding of scalable architectures and clean code principles.
